MEASURES OF ACADEMIC PROGRESS

We track our school's academic achievement over time with two measures: the Academic Performance Index (API) and Adequate Yearly Progress (AYP). These measures combine test results differently and often provide conflicting views of student progress.

Academic Performance Index (API)

This is California's way of rating schools. The API is based on student test scores, and it rates schools on a scale from 200 to 1000. The state expects schools to obtain an API of 800. Underperforming schools have APIs falling in the bottom half of all schools in the state and are eligible for state-funded programs to improve student achievement. Our school's API was 756, compared with 752 for the average elementary school.

Adequate Yearly Progress (AYP)

This is a federal measure that requires schools to meet test score goals schoolwide and for subgroups* of students. If just one group of students fails to meet its goals, the school does not make AYP. Program Improvement (PI) schools did not make AYP for two or more years in a row in the same subject. They must offer students transfers to other schools in the district and, in their second year in PI, tutoring services as well.

* - Includes English learners, special education students, low-income students, and ethnic groups that must meet separate API and AYP goals.

N/A - Data were not available or not reported; the number of valid test scores was too small for statistical significance; the school or district is changing the testing data and a new API will be released in 2006; or the school participates in an alternative accountability program.

† - Includes schools participating in the Immediate Intervention/Underperforming Schools Program and the High Priority Schools Grant Program.
